(54) Title: TREATMENT OF PREMATURE EJACULATION

(57) Abstract: The invention relates to methods and compositions for treating premature ejaculation in a male or prolonging intercourse comprising administering to the male an antidepressant via a route selected from the group consisting of mucosal administration (preferably nasal, buccal or rectal), administration to the lungs (preferably by inhalation), local administration to at least a part of the male genitalia (applied to the penis for example, in the form of a gel) and combinations thereof.
